KNOW YOUR CATEGORIES · SMALL CAP FUND

Under SEBI's categorisation rules, a small cap fund is an open-ended equity scheme that must keep at least 65% of its total assets in the shares of small cap companies, which SEBI defines as the 251st listed company onwards by full market capitalisation. SEBI's circular of 26 February 2026 kept the 65% minimum. These are equity schemes, so their value rises and falls with the share prices of smaller companies, and each scheme's riskometer level is set out in the fund house's own documents. AMFI (copy of SEBI circular of 6 Oct 2017), SEBI, Upstox News

NEW FUND OFFERS

Five new fund offers remain open into next week, according to Cafemutual: a silver ETF and a silver fund of funds, a realty index fund, an energy ETF and a fixed maturity plan. Each scheme's category, riskometer level and terms are in its scheme information document. This list is reported for information only and is not a recommendation. Cafemutual NFO list

RULE CHANGES FOR INVESTORS

SEBI, 1 Nov. Since 1 November, direct plans are the default option on fund houses' own digital platforms, and investors who choose a regular plan there are told it carries a higher expense ratio. Regular plans remain available. Cafemutual

L-008: What a weekly change measures

This week the NIFTY 50 went from 23,053.10 on 30 Oct to 25,030.35 on 6 Nov, a change of 8.58%, though no single day rose that much.
