PART 2 OF 7

Market drivers

Crude and other local factors, how global markets reach India, and the events and data ahead

2.1 · WHAT IS DRIVING MARKETS

Inflation above 6%, crude near $96 and US yields above 5% frame Friday's session

Inflation and the RBI. October retail inflation rose to 6.09% from 5.54%, with consumer food inflation at 8.94% (Reuters, Business Today). SBI Research now expects a 25 basis point rise at the RBI's 2 to 4 December review rather than 50, and Bank of Baroda's Madan Sabnavis expects 25 or 50 (Business Today). Rate expectations reach bond yields, deposit rates and loan rates. Business Today, Reuters via Investing.com, The Hans India

Crude oil. Brent settled 3.3% higher at $95.82 on Thursday after Yemen's Houthis claimed attacks on Saudi energy sites, having fallen about $1 in early Asian trade (Reuters). India imports most of its crude, so oil prices reach the import bill, the rupee and fuel inflation. The Nation (citing Reuters), Reuters via Investing.com

The rupee and bonds. The rupee closed 33 paise weaker at a provisional 94.04 per dollar as the dollar firmed (PTI), and the 10-year G-Sec yield was about 7.25%, up 4 basis points (Trading Economics). A weaker rupee raises the cost of imports; bond prices fall when yields rise. PTI via HDFC Sky, Trading Economics

Foreign flows and index changes. Foreign investors bought a net ₹73,566 crore in the cash market from 1 to 12 Nov (provisional, Kotak Neo). Separately, Nuvama estimates about $2 billion of passive inflows from MSCI's November index review, effective 30 Nov (Business Standard). Foreign flows feed into large-cap prices and the rupee. Kotak Neo FII/DII data, Business Standard

2.2 · HOW GLOBAL MARKETS REACH INDIA

US shares. The S&P 500, Dow and Nasdaq each fell about 0.4% on Thursday and the Russell 2000 fell 1.7% (AP). Moves on Wall Street tend to shape foreign investors' appetite for emerging market shares, including India's. AP via Yahoo Finance

US yields, the Fed and the dollar. The US 10-year yield rose back above 5% to about 5.10% and the dollar index to 103.19 (CappNotes). CME FedWatch put the chance of a quarter-point Fed rise in December near 85% (Investing.com). Higher US yields and a firmer dollar tend to weigh on the rupee and on foreign flows into Indian bonds and shares. CappNotes, Investing.com, Kitco

Asian markets. On Thursday Japan's Nikkei fell 0.7% and Hong Kong's Hang Seng 1.26% (AP, CappNotes). On Friday morning Japanese and Korean shares opened higher as chip stocks rose (TradingKey). AP via STL.News, CappNotes, TradingKey

L-012: What the retail inflation number measures

India's monthly retail inflation figure measures how much the prices of a basket of goods and services that households buy have changed from a year earlier.

In October it was 6.09%, up from 5.54% in September, and consumer food inflation was 8.94% (Reuters, Business Today). Food prices can move the figure noticeably: onion prices were up 116.22% from a year earlier (Business Today).

The RBI's tolerance band has an upper limit of 6%, so a reading above it feeds into expectations for the policy rate, which economists at SBI Research and Bank of Baroda have discussed ahead of the RBI's 2 to 4 December review (Business Today, Hello Banker).

COMPANIES AND SCHEMES MENTIONED

Companies, securities, indices and mutual fund schemes appear only as reported facts, for example the day's largest gainers and losers, quarterly results or open new fund offers. A mention is not a recommendation, an endorsement or a rating, and no opinion is given on their prospects.

Dhariwal Securities, its directors and its employees may hold, buy or sell investments in the securities or mutual fund schemes mentioned. Dhariwal Securities distributes schemes of many fund houses and may receive commission on investments in schemes or categories mentioned in the Brief; commission rates differ across schemes and fund houses, as set out in the commission disclosures on kubeerra.com.

Riskometer levels are taken from each fund house's own documents as of the date stated and may change. Read the scheme information document, key information memorandum and statement of additional information before investing.

RISKS

Investments in the securities markets and in mutual funds are subject to market risks, including the possible loss of the amount invested. Past performance may or may not be sustained in future and is not a guarantee of future results. There is no assurance or guarantee of returns. Any return shown as an illustration is hypothetical and is not a promise or a forecast.

COMMISSIONS AND DIRECT PLANS

Dhariwal Securities receives commission from asset management companies on mutual fund investments made through it, as set out in the commission disclosures on kubeerra.com. Investors can also invest directly with fund houses through direct plans, which carry lower expense ratios because no distribution commission is paid.

YOUR DECISIONS

Make investment decisions on the basis of your own objectives, financial situation and tolerance for risk, after reading the offer documents. Where appropriate, consult a SEBI-registered Investment Adviser and a tax or legal professional before investing.

LIMITATION OF LIABILITY

To the fullest extent permitted by law, Dhariwal Securities, its directors, employees and associates accept no liability for any loss or damage of any kind, whether direct, indirect or consequential, arising from the use of, or reliance on, the Brief or any information in it.
