Foreign buying and lower bond yields set the tone; Diwali brings a special session and a holiday

Foreign flows. Foreign investors bought a net ₹14,975 crore on 5 Nov (provisional), after ₹7,284 crore on 4 Nov. Foreign flows feed into large-cap share prices and the rupee; provisional figures can be revised when final data is published. Business Standard, Upstox FII/DII data

Reuters via Investing, Fox Business

US yields and the dollar. The US 10-year Treasury yield fell about 5 basis points to about 4.84% as investors moved into bonds, and the dollar index was little changed. US yields and the dollar shape foreign flows and the rupee. Rio Times, AP via NBC Bay Area

KNOW YOUR CATEGORIES · MID CAP FUND

Under SEBI's categorisation rules, a mid cap fund is an open-ended equity scheme that must keep at least 65% of its total assets in the shares of mid cap companies, which SEBI defines as the 101st to 250th listed companies by full market capitalisation. SEBI's circular of 26 February 2026 kept the 65% minimum. These are equity schemes, so their value rises and falls with the share prices of mid-sized companies, and each scheme's riskometer level is set out in the fund house's own documents. SEBI, AMFI (copy of SEBI circular of 6 Oct 2017), Upstox News

NEW FUND OFFERS

Five new fund offers are open on 6 November, according to Cafemutual and Angel One: an energy ETF, a silver ETF, two silver funds of funds (one of them closing on 6 November) and a realty index fund. Each scheme's category, riskometer level and terms are in its scheme information document. This list is reported for information only and is not a recommendation. Cafemutual NFO list

RULE CHANGES FOR INVESTORS

SEBI, 1 Nov. Since 1 November, direct plans are the default option on fund houses' own digital platforms, and investors who choose a regular plan there are told it carries a higher expense ratio. Regular plans remain available. Cafemutual

Questions about how mutual funds work?

The Kubeerra team can explain how a scheme or category works, what it costs and the risks it carries, from the fund house's own documents. L-007: Where a scheme's riskometer is published

Every mutual fund scheme carries a riskometer, a dial that shows the level of risk of the scheme's portfolio, from low to very high.

For a new fund offer, the riskometer appears in the scheme's key information memorandum and scheme information document, which the fund house publishes before the offer opens.

Read more: scheme information document

The level describes the portfolio, not the investor, and it can change after launch as the portfolio changes, so the fund house's latest documents carry the current level.
